INDIA@2030

SCALING GOOD GROWTH

India is already a shining beacon of growth and development in the 21st century. Now, as a leader of the Global South, our collective voice must be a powerful advocate for people and planet-positive innovation, action, and impact.

We know our 2030 ambitions are bold, clear, and inspirational – but ambition will only get us part of the way to the future we seek. At home and abroad we will need partners to actively collaborate on systemic challenges; to embrace new ideas and realise new solutions; and to find new ways to balance the economic, social, and environmental needs of our world.

Together, India can showcase the sustainable and responsible practices that are required to scale Good Growth.

Why join us?

The Exchange, presented by Hindalco in collaboration with Xynteo – India @ 2030, Scaling Good Growth – brings together Indian and international business leaders with thought leaders, policy makers and change makers.

The programme will engage you in perspective shaping conversations, shape action-orientated solutions, and accelerate India's ambitions for an inclusive and planet-positive future.

THE EXCHANGE 2024, PRESENTED BY HINDALCO IN COLLABORATION WITH XYNTEO, IS AN EXCLUSIVE INVITE-ONLY EVENT OVER TWO DAYS IN NEW DELHI.

15 FEBRUARY : 16:00 – 21:00

16 FEBRUARY : 10:00 – 18:30

ABOUT THE STUDIOS

DATE	TIME	VENUE
16 FEBRUARY 2024	11:00 – 13:00	MANEKSHAW CENTRE

Studios are active working group sessions, with participation for each discussion curated to ensure a diversity of perspectives, skills, and insights, with the aim of incubating commercially-driven project concepts for complex systemic problems.

	METALS AND MINING	DECARBONISING THE BUILT ENVIRONMENT	PLASTICS CIRCULARITY
THEME	How can we accelerate adoption of technologies and solutions for decarbonisation of India’s metals and mining industry?	What tangible solutions can we co-create to accelerate the decarbonisation of the built environment?	How can we accelerate replicability of inclusive, decentralised and financially viable circularity models across India?
KEY QUESTIONS	<ul style="list-style-type: none"> How can we leverage cross-sectoral collaboration to enable carbon capture & utilisation (CCU) from India’s hard-to-abate sectors? How can we integrate and scale the use of biofuels in India’s metals and mining industry? How can we accelerate electrification of industrial processes in India’s metals and mining industry? 	<ul style="list-style-type: none"> How can we enhance decision-making across the value chain to enhance the adoption of low carbon building materials? How can the affordable housing schemes scale up low carbon construction and increase private sector participation? How can we increase circularity in construction with uptake of construction & demolition waste? How can we partner to deliver holistically sustainable buildings and create a pathway to Net-Zero buildings? 	<ul style="list-style-type: none"> How do we accelerate the replication of circular economy models by decentralising Material Recovery Facilities (MRFs) with a viable business case? How can we empower informal waste workers for their long-term social inclusion in the value chain? How can we ensure stickiness when pursuing behavioural change for successful and sustainable segregation of waste at source?
EXPECTED OUTCOMES	<ul style="list-style-type: none"> Identify applications, geographies and business models that make CCU viable in India’s hard-to-abate sectors Identify collaboration opportunities to accelerate biofuel adoption and blending as well as Electrification across the metals & mining value chain 	<ul style="list-style-type: none"> Drivers for the adoption of low carbon building materials in construction Interventions to scale sustainability in affordable housing and to increase circularity in construction and demolition waste Pathways for sustainable and Net-Zero buildings 	<ul style="list-style-type: none"> Drivers of action for each key question and how enablers might be incentivised/ motivated to act? Support from stakeholders in driving replicability of the model across India
